Jonatan Saveljeff

Senior Engineer • Healthcare / TI

Munich, Germany • Open to remote / freelance • freelance.saveljeff@gmail.com • LinkedIn • GitHub

PROFILE

Senior engineer with 5+ years building reliable, privacy-minded software for healthcare. Experienced across desktop and web: Electron and Golang desktop applications, React front-ends, Node.js, CI/CD and AI automation. Deep familiarity with Germany's Telematikinfrastruktur (TI) and its applications: eRx, eAU, ePA and KIM.

EXPERIENCE

Senior Engineer — TeleClinic

5+ years • Munich

Specialist IT Development

- Built and maintained doctor-facing software: an Electron application and a Golang desktop application connecting practices to the gematik TI.
- Worked on AI features, AI-driven automation and optimization of AI workflows.
- Migrated company CI from Bitbucket to GitLab early on, and maintained GitLab CI across teams until a dedicated infra team was in place.
- Created internal developer tools used across engineering.

Mechanic — IKEA

3+ years • Warehouse & logistics

- Maintained and repaired large warehouse machinery: conveyor belts, trucks and pallet cranes.
- Serviced pneumatically operated machines.
- Serviced electrical components: driver cards for pallet positioning, lasers and storage database systems.
